

We live on the southern Oregon coast and are against making the area a marine reserve.

We have lost our lumber mills and jobs due to the shut down of timber harvest on the national forest. If you closed down our fishing industry and sports fishing, it would be just another blow to our local economy.

We believe fishing and hunting should be regulated by State and Local Fish and Game commissions.

Too often laws and regulations are set by people that live elsewhere where there is no impact from regulations and laws imposed.

The whole country cannot be supported by tourism alone.

We need to be able to use the natural resources that we have in our own country for the benefit of our citizens.

Our best regards

Allen & Barbara Castle
